320 and Up

The 'tiny screen first' responsive boilerplate

[320 and Up on Github](#)

[Download](#)

This is the new '320 and Up'

A lot's changed since I wrote [the original '320 and Up'](#), my 'tiny screen first' responsive web design boilerplate. Back then we were just getting started with responsive web design and many sites, including mine, and frameworks and boilerplates like [HTML5 Boilerplate](#), structured their CSS3 Media Queries from the desktop down, rather than for small screens up.

(Oh how we laughed when we realised our mistake.)

To put things right, I wrote '320 and Up'. It worked as an extension to [HTML5 Boilerplate](#) or a set of standalone files. '320 and Up' has been used by designers and developers all over the web and I've used versions of it on every website I've worked on since I wrote it.

What's in the new '320 and Up'?

Five CSS3 Media Query increments: 480, 600, 768, 992 and 1382px

Design 'atmosphere' (colour, texture and typography) separated from layout

[Bootstrap](#) styles for buttons, forms and tables

Font-based icons from [Font Awesome](#)

Modernizr, Selectivizr, responsive type tester and design tester
